No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1990 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

This journal is printed on acid-free paper.

CONTENTS OF VOLUME 34

Number 1, July 1990

Thomas V. Lowell, Kevin M. Savage, C. Scott Brockman, and Robert Stuckenrath. Radiocarbon Analyses from Cincinnati, Ohio, and Their Implications for Glacial Stratigraphic Interpretations 1

James T. Teller. Volume and Routing of Late-Glacial Runoff from the Southern Laurentide Ice Sheet 12

Barney J. Szabo. Ages of Travertine Deposits in Eastern Grand Canyon National Park, Arizona 24

Joseph F. Donoghue. Trends in Chesapeake Bay Sedimentation Rates during the Late Holocene 33

James G. Bockheim and Fiorenzo C. Ugolini. A Review of Pedogenic Zonation in Well-Drained Soils of the Southern Circumpolar Region 47

Louis A. Scuderi. Tree-Ring Evidence for Climatically Effective Volcanic Eruptions 67

M. Royd Bussell. Palynology of Oxygen Isotope Stage 6 and Substage 5e from the Cover Beds of a Marine Terrace, Taranaki, New Zealand 86

Linda E. Heusser and Joseph J. Morley. Climatic Change at the End of the Last Glaciation in Japan Inferred from Pollen in Three Cores from the Northwest Pacific Ocean 101

Thomas W. Stafford, Jr., P. E. Hare, Lloyd Currie, A. J. T. Jull, and Douglas Donahue. Accuracy of North American Human Skeleton Ages 111

Christophe Falgueres, Yuji Yokoyama, and Roland Bibron. Electron Spin Resonance (ESR) Dating of Hominid-Bearing Deposits in the Caverna delle Fate, Ligure, Italy 121

Book Review

Vorsila L. Bohrer. *Paleoethnobotany*. By D. M. Pearsall 129

Publications of Interest 130

Number 2, September 1990

Howard D. Mooers. Discriminating Texturally Similar Tills in Central Minnesota by Graphical and Multivariate Techniques 133

William A. Newman, Richard C. Berg, Peter S. Rosen, and Herbert D. Glass. Pleistocene Stratigraphy of the Boston Harbor Drumlins, Massachusetts 148

Nancy Bigelow, Jim Begét, and Roger Powers. Latest Pleistocene Increase in Wind Intensity Recorded in Eolian Sediments from Central Alaska 160

Brian G. Lees, Lu Yanchou, and John Head. Reconnaissance Thermoluminescence Dating of Northern Australian Coastal Dune Systems 169

Glenn A. Goodfriend. Rainfall in the Negev Desert during the Middle Holocene, Based on ^{13}C of Organic Matter in Land Snail Shells 186

Carolina Villagrán and Juan Varela. Palynological Evidence for Increased Aridity on the Central Chilean Coast during the Holocene 198

John J. Clague, Richard J. Hebda, and Rolf W. Mathewes. Stratigraphy and Paleoecology of Pleistocene Interstadial Sediments, Central British Columbia 208

K. A. Moser and G. M. MacDonald. Holocene Vegetation Change at Treeline North of Yellowknife, Northwest Territories, Canada 227

Kenji Kashiwaya and Takashi Okimura. Reconstruction of Past Erosional Force from Tree Ring Information around the Rokko Mountains, Japan..... 240

Scott A. Elias and Thomas R. Van Devender. Fossil Insect Evidence for Late Quaternary Climatic Change in the Big Bend Region, Chihuahuan Desert, Texas 249

Letters to the Editor

Roger LeB. Hooke. Discussion of "Use of Multiparameter Relative-Age Methods for Age Estimation and Correlation of Alluvial Fan Surfaces on a Desert Piedmont, Eastern Mojave Desert, California" 262

S. G. Wells, L. D. McFadden, and J. B. Ritter. Reply to R. LeB. Hooke's Discussion of "Use of Multiparameter Relative-Age Methods for Age Estimation and Correlation of Alluvial Fan Surfaces on a Desert Piedmont, Eastern Mojave Desert, California" 263

Book Review

Louis Scott. *Late Quaternary Palaeoenvironments of Southern Africa.* By Janette Deacon and N. Lancaster 266

Announcement 267

Number 3, November 1990

Peter D. Lea and Christopher F. Waythomas. Late-Pleistocene Eolian Sand Sheets in Alaska 269

Bertrand Blaise, John J. Clague, and Rolf W. Mathewes. Time of Maximum Late Wisconsin Glaciation, West Coast of Canada 282

Peter U. Clark and William W. Fitzhugh. Late Deglaciation of the Central Labrador Coast and Its Implications for the Age of Glacial Lakes Naskaupi and McLean and for Prehistory 296

Stein-Erik Lauritzen, Reidar Løvlie, Dagfinn Moe, and Eivind Østbye. Paleoclimate Deduced from a Multidisciplinary Study of a Half-Million-Year-Old Stalagmite from Rana, Northern Norway 306

Tjeerd H. van Andel, Eberhard Zangger, and Constantine Perissoratis. Quaternary Transgressive/Regressive Cycles in the Gulf of Argos, Greece 317

Mark B. Bush, Paul A. Colinvaux, Michael C. Wiemann, Dolores R. Piperno, and Kam-biu Liu. Late Pleistocene Temperature Depression and Vegetation Change in Ecuadorian Amazonia 330

Ricardo Villalba. Climatic Fluctuations in Northern Patagonia during the Last 1000 Years as Inferred from Tree-Ring Records 346

Luis Alberto Borrero. Taphonomy of Guanaco Bones in Tierra del Fuego 361

Letter to the Editor

Sherif A. Awadallah and Martin J. Batterson. Comment on "Late Deglaciation of the Central Labrador Coast and Its Implications for the Age of Glacial Lakes Naskaupi and McLean and for Prehistory," by P. U. Clark and W. W. Fitzhugh 372

Publications of Interest 374

Book Review

Daniel H. Mann. *The Little Ice Age*. By Jean Grove 378

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and constitute a significant contribution to knowledge. Previously unpublished research results, comprehensive reviews of syntheses of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered.

Four categories of manuscripts will be considered for publication. *Articles* may not exceed 5000 words, or approximately 20 double-spaced typewritten pages, including tables and references. Exceptions to this rule are rarely made. *Short Papers* should not exceed 1500 words and should include no more than two figures; such contributions will normally be published more rapidly than full-length articles. *Letters to the Editor* will also be considered. If dealing with a paper previously published in *Quaternary Research* the author(s) of that paper will be given the opportunity of drafting a reply. Normally both the Letter to the Editor and the Reply will be published in the same issue. *Book Reviews* will be published only if solicited by the Book Review Editor and only after critical review by the Editors.

Manuscripts submitted to *Quaternary Research* that do not meet the length requirements of the journal will be returned to the author(s) for appropriate revision.

All manuscripts will be reviewed by at least two referees. Articles and Short Papers are evaluated as to whether they are interdisciplinary in content and of broad interdisciplinary interest, scientifically sound, and present evidence that is sufficient to support the conclusions. They are also evaluated for organization, clarity, and conciseness. The Editors' decision is sent to the author(s) together with the referees' comments and evaluations as soon as the file is complete.

Three copies of the manuscript, including legible copies of all figures, should be submitted to:

Quaternary Research Editorial Office
Quaternary Research Center (AK-60)
University of Washington
Seattle, Washington 98195

Manuscripts are accepted for review with the understanding that the same work or closely similar work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out: further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Quaternary Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the University of Washington. The University will not refuse any reasonable request by the author(s) for permission to reproduce any contributions to the journal.

INSTRUCTIONS TO AUTHORS

General instructions. Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and style. Manuscripts should be concise, but detailed enough to permit critical appraisal. They should be typewritten and double-spaced *throughout* (including references, tables, figure legends, and footnotes) on one side of approximately 22 × 28 cm (8.5 × 11 in.) paper with 2.5-cm (1-in.) margins. If composed on a word processor, a letter-quality dot-matrix or daisy-wheel printer should be used. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s) (given names, rather than initials are preferred), affiliation(s) and address(es),

ICARUS

International Journal of Solar System Studies

Editor
Joseph A. Burns
Cornell University, Ithaca, New York

Original Contributions in the Field of Planetary Science

The journal reports the results of new research—observational, experimental, or theoretical—concerning the astronomy, geology, meteorology, physics, chemistry, biology, and other scientific aspects of the solar or extrasolar systems. **Icarus** also features special issues and sections on special topics or reports on particular missions.

Thematic Issues and Sections Have Included

- Protostars and planets
- Asteroids
- Jovian atmosphere
- Mars dust
- Mercury
- Origin and evolution of planetary and satellite atmospheres

Published in affiliation with the Division for Planetary Sciences, American Astronomical Society

Volumes 83–88 (1990), 12 issues
ISSN 0019-1035
In the U.S.A. and Canada: $732.00
All other countries: $834.00

Sample copies and privileged personal rates are available upon request.
